

(Continued from back cover)

P. PAULRAJA AND S. SAMPATH KUMAR: <i>On Hamiltonian decompositions of tensor products of graphs</i>	178–202
CONG X. KANG, ISMAEL G. YERO, EUNJEONG YI: <i>The fractional k-metric dimension of graphs</i>	203–223
LITAO GUO, GUIFU SU, LUTZ VOLKMANN, XINGKE ZHAO: <i>Maximally and super connected multisplit graphs and digraphs</i>	224–239
ZHEN-HANG YANG AND JING-FENG TIAN: <i>Convexity and monotonicity for elliptic integrals of the first kind and applications</i>	240–260
MIECZYSLAW BOROWIECKI, ANNA FIEDOROWICZ, ELŻBIETA SIDOROWICZ: <i>Connected domination game</i>	261–289
MICHAEL TH. RASSIAS AND BICHENG YANG: <i>A reverse Mulholland-type inequality in the whole plane with multi-parameters</i>	290–308
KHALED MEHREZ AND ŽIVORAD TOMOVSKI: <i>On a new (p, q)-Mathieu-type power series and its applications</i>	309–324
G.E. CHATZARAKIS, K. LOGAARASI, T. RAJA, V. SADHASIVAM: <i>Interval oscillation criteria for impulsive conformable partial differential equations</i>	325–345

Prepress and layout: Bojan Banjac, Branko Malešević

Publisher: University of Belgrade, Faculty of Electrical Engineering

Printed: April 2019.

CONTENTS

GRADIMIR V. MILOVANOVIĆ, MIROSLAV S. PRANIĆ, MIODRAG M. SPALEVIĆ: <i>Quadrature with multiple nodes, power orthogonality, and moment-preserving spline approximation, part II</i>	001–027
OLGA BODROŽA-PANTIĆ, HARRIS KWONG, RADE DOROSLOVAČKI, MILAN PANTIĆ: <i>Enumeration of Hamiltonian cycles on a thick grid cylinder — Part I: Non-contractible Hamiltonian cycles</i>	028–060
AIMIN XU <i>On an open problem of Simsek concerning the computation of a family of special numbers</i>	061–072
WAYNE GODDARD AND MICHAEL A. HENNING: <i>Acyclic total dominating sets in cubic graphs</i>	073–084
LUKA MILIĆEVIĆ: <i>Covering complete graphs by monochromatically bounded sets</i>	085–110
SAMAD MOHSENI KOLAGAR, GHASEM A. AFROUZI, JOHN R. GRAEF: <i>Variational analysis for Dirichlet impulsive fractional differential inclusions involving the p-Laplacian</i>	111–130
PREDRAG S. STANIMIROVIĆ, XUE-ZHONG WANG, HAIFENG MA: <i>Complex ZNN for computing time-varying weighted pseudo-inverses</i>	131–164
HUILI MA AND HAIXIA WANG: <i>On the solutions of a class of max-min-type difference equation system</i>	165–177
