

(Continued from back cover)

AYHAN DIL AND ERKAN MUNIROĞLU: <i>Applications of derivative and difference operators on some sequences</i>	406–430
HAIYAN GUO AND BO ZHOU: <i>On the α-spectral radius of graphs</i>	431–458
ANA M. VELIMIROVIĆ: <i>Conformal curvature tensors in a generalized Riemannian space in Eisenhart sense</i>	459–471
ABDULLAH MIR: <i>Integral norm estimates for the polar derivative of Lacunary-type complex polynomials</i>	472–489
HORST ALZER AND MAN KAM KWONG: <i>A chain of mean value inequalities</i>	490–497
IVANA JOVOVIĆ: <i>Differential transcendence of solutions of systems of linear differential equations based on total reduction of the system</i>	498–511
FENG QI, DA-WEI NIU, DONGKYU LIM AND BAI-NI GUO: <i>Some logarithmically completely monotonic functions and inequalities for multinomial coefficients and multivariate beta functions</i>	512–527

Printed : *October 2020.*

Prepress and layout : *Bojan Banjac, Branko Malešević*

Publisher : *University of Belgrade, Faculty of Electrical Engineering*

Printed by *PLANETA PRINT d.o.o., Belgrade*

Published twice a year

CONTENTS

ANGELES CARMONA, MARGARIDA MITJANA AND ENRIC MONSÓ: <i>Group inverse matrix of the normalized laplacian on subdivision networks</i>	272–286
M. KIAN, M. KRNIĆ AND M. ROSTAMIAN DELAVAR: <i>External Jensen-type operator inequalities via Superquadraticity</i>	287–299
SLOBODAN B. TRIČKOVIĆ AND MIOMIR S. STANKOVIĆ: <i>On a generalized function-to-sequence transform</i>	300–316
BEIH S. EL-DESOUKY, RABAB S. GOMAA AND ALIA M. MAGAR: <i>The multi-variable unified family of generalized Apostol-type polynomials</i>	317–334
WENCHANG CHU AND EMRAH KILIÇ: <i>q-Binomial formulae of Dixon's type and the Fibonomial sums</i>	335–348
SAMEERAH JAMAL AND ANDRONIKOS PALIATHANASIS: <i>Approximate symmetries and similarity solutions for wave equations on liquid films</i>	349–363
LENNY NEYT AND JASSON VINDAS: <i>Asymptotic boundedness and moment asymptotic expansion in ultradistribution spaces</i>	364–381
ANTANAS LAURINČIKAS: <i>Discrete universality of the Riemann Zeta-function in short intervals</i>	382–405
